Training Program at Cardamom Research Centre Report

Second Semester B.Ed Trainees of JSS Institute of Education, Sakaleshpur visited Indian cardamom research station at Dhonigal Sakaleshpur on 24.8.2023 for one day Training programme.

Spices Board of India was established in 1987 to develop, promote and regulate export of 52 spices and spice products that fall under its purview. It also engages in the promotion of production, processing, domestic marketing and export of cardamom (both small and large).

Important role of Spices Board of India is to ensure the quality of Indian spices being exported. The board carries out regular inspections of spice processing units and packaging facilities to ensure that the spices being exported meet the required quality standards. This helps to maintain the reputation of Indian spices as a high-quality product and to prevent the export of substandard spices

The Spices Board of India also provides technical assistance to spice farmers and processors. This includes providing information on the latest technologies and best practices in spice production, processing, and packaging. The board also provides training to farmers and processors on the use of these technologies, which helps to improve the quality and yield of Indian spices.

Dr Harsha KN, scientist, cardamom research centre welcomed all of us. The main research is done in crops like pepper and cardamom. He explained the functions and activities that are under taking in the research center. He also explained the different methods of grafting, cutting, layering, mulching etc.. He also stressed the importance of organic farming.

Sri Siddarth research scholar in his power point presentation explained pepper nursery management, structures of poly house tunnel, glasshouse, shadehouse etc. In his PPT presentations he explain about nursery activities media preparation ,poly bag arrangement and cuttings runner shoot etc.

Another reseach scholar Supriya madam, gave a PPT presentation on the topic vegetative methods of plat prapogation , root cutting, Air layraring grafting etc.

After this presentation we went to the field to get hands on experience in pollination , media preparation , cutting of runners of pepper , Air layering and other grafting techniques .

Then we visited to the library section and observed on the laboratory like entomology , pathology , agronomy ,the soil testing labs etc,

Dr. Dinesh M K and Dr. Vikram C B Assistant professor, JSS Institute of Education Sakaleshpura supervised the students at training programme. Dr. Dinesh M K Assistant professor gave vote of thanks to all who made this program success.

FIELD VISIT TO HASSAN DISTRICT PLANTERS ASSOCIATION, SAKLESHPUR

Hassan District Planters Association (HDPA) popularly known as “HDPA”, with the objectives of providing a voice to the coffee growers of Hassan district in national and international forums, a federation of 10 associations (both taluk and hobli level) of Hassan was formed in the year 1977 with a membership base of 10000 men and women.

WESTERN GHATS ECO-FRIENDLY BAND (WEB) TRAINING UNIT OF HDPA

A unit of Hassan district planters association will be a complete training institute for coffee plantation mainly to promote Arabica and other products with the purpose of transferring technology from nursery to market in an academic year of training. The motto of training initiative is to preserve Geological identity of Western Ghats coffee plantation produced under eco-friendly environment.

On 16/03/2024 at 10:30 AM all the teacher trainees of second year B.Ed program along with Dr.Dinesh M K and Dr.Vikram C B coordinator of science club visited the HDPA as scheduled earlier in association with IQAC under the science club.

The programme was inaugurated by Krishnamurthi, president of HDPA by sharing the stage with Lohith Kowdalli, member of planters association and Girish, member of planters association and Krishnamurthi welcomed the gathering and guests to this programme.

Followed by the lecture on the P^H level of soil, layers of soil, application of lime to soil, sustainability of soil for the good plant growth, and P^H level of soil at higher rain fall areas was

given by Girish, member of planters association. The programme was continued by the guest lecture about the soil test, soil testing laboratory, cost for soil testing, cost for testing P^H level of soil and how to collect the sample for soil test, this was presented by Lohith Kowdalli, member of planters association.

A small tea break, after this all the student teachers were allowed to visit the soil testing laboratory to get live experience about the procedures followed, equipment's used, report of soil test etc. all these was explained well by Gayathri, laboratory assistant, HDP, Sakleshpur.

This field visit was very helpful and educationally useful for each and everyone, as everyone is from agriculture background. This test should be done frequently to keep soil fertile.

We thank our beloved professors for making us visit to HDP, Sakleshpur.
