These classes were very much helpful because the teachers trainees are from rural background and backward areas, lack in good English communication skill. They are less exposed to the English language and literature. It is also observed that they are having faulty pronunciation pattern, improper voice modulation, stress and intonations. They don't have mastery over the language and have less vocabulary.

The analysis of the YouTube Spoken English test of student-teachers of 2022-24 academic year clearly shows that majority of the student-teachers are obtained lot of information and knowledge regarding the English grammar, the usage of sentences, the punctuation marks and knowledge about spoken English. It also pointed that their interest towards spoken English classes is comparatively high. Only a few members have lack of awareness about the Spoken English Class because of dis interest towards the course itself. So, it is very important to provide necessary training programme to improve their English communication skill and enhance the focused towards their Spoken English language. It is also necessary to design the training programmes which will cater their interest to the maximum level towards English Language.
